UX & UI Design Service Design Design Systems AI-Assisted Prototyping

01 PROFILE

Senior product designer with **8+ years** across UX, UI, and service design, focused on **design systems** and complex enterprise platforms in healthcare, energy, edtech, and SaaS. I work end to end — from research through to **production-ready prototypes** built with AI-assisted development. That turns dense, technical domains into clear, business-driving interfaces, and hands engineers something concrete instead of a static mockup. Fluent in Dutch, English & Russian.

02 FEATURED PROJECT

Neospower — *EMS* Dashboard BATTERY STORAGE SAAS END-TO-END DESIGN + AI-BUILT PROTOTYPE

Designed and prototyped an Energy Management System for a battery storage (BESS) product — visualizing real-time trading, peak shaving, energy flow, and Day-Ahead / imbalance pricing. Shipped **developer-ready React/TypeScript prototypes** (Lovable, Recharts) plus an implementation brief, making complex energy-arbitrage logic legible to non-technical operators.

~40% **Live** **60+**
FASTER TIME-TO-INSIGHT INTERACTIVE CODE, NOT STATIC SPECS SHARED SYSTEM COMPONENTS

03 EXPERIENCE

Senior UX & UI Designer · *Health Cloud Initiative* Mar 2025 — Present

- Lead the modernization of electronic health record (EPD/EHR) design across a fast-scaling healthcare organization.
- Built a system-agnostic design library standardizing **60+ shared components** across the product suite.

Digital Product Designer · *Aloden* (Independent) Nov 2021 — Present

- Run an independent UX/UI & product practice for web and mobile — including the Neospower EMS work above.
- Increasingly deliver **AI-built, interactive prototypes** (Lovable, React/TS) rather than static files, closing the gap between intent and shipped product.

UX & Service Designer · *Kwins* Jul — Nov 2024

- Mapped journeys and redesigned complex management systems, cutting key task completion time by **~30%**.

UI & UX Designer · *Wizenoze* (Contract) Feb — Jul 2024

- Designed AI-driven solutions for higher & scientific education using LLM and generative-AI technologies.

UI & UX Designer · *Picasse* Jan 2021 — Nov 2023

- Built and evolved a dynamic, accessible (WCAG) design system, cutting design-to-dev handoff time by **~40%**.

UI & UX Designer · De Renovatieplanner 2020 — 2021
UX Designer · Xaranea 2020
UI & UX Designer · Appsharing 2019 — 2020
UI & UX Designer · Fans4Music (Internship) 2017 — 2018

Experience *in detail*

02 / 03

03 FULL EXPERIENCE

- **Senior UX & UI Designer · Health Cloud Initiative** Mar 2025 – Present
HEALTHCARE · ELECTRONIC HEALTH RECORDS
Leading the modernization of electronic health record (EPD/EHR) design across a fast-scaling healthcare organization.
 - Built a scalable, system-agnostic design library now standardizing **60+ shared components** across the product suite.
 - Drive strategic improvements in both interface design and marketing design direction, working alongside fellow designers.
- **Digital Product Designer · Aloden** Nov 2021 – Present
INDEPENDENT PRACTICE · WEB & MOBILE
Running an independent UX/UI and product design practice for web and mobile platforms — including the Neospower EMS work — alongside other client and contract engagements.
 - Increasingly deliver **AI-built, interactive prototypes** (Lovable, React/TypeScript) rather than static files, closing the gap between design intent and shipped product.
 - Translate complex requirements into intuitive interfaces that balance user needs with business goals, partnering directly with clients, developers, and stakeholders.
- **UX & Service Designer · Kwins** Jul – Nov 2024
COMPLEX MANAGEMENT SYSTEMS
Mapped user journeys and redesigned interfaces for complex management systems, streamlining core service flows.
 - Turned user insights into data-driven solutions with cross-functional teams, cutting key task completion time by **~30%**.
- **UI & UX Designer · Wizenoze (Contract)** Feb – Jul 2024
HIGHER & SCIENTIFIC EDUCATION · AI
Designed AI-driven solutions for the higher and scientific education sectors, working with LLM and generative-AI technologies.
 - Contributed to the design system and interface prototyping for education-sector products.
- **UI & UX Designer · Picasse** Jan 2021 – Nov 2023
DIGITAL PRODUCT ECOSYSTEM · ACCESSIBILITY
Made the digital product ecosystem more accessible and user-friendly for a diverse customer base, applying WCAG accessibility guidelines.
 - Built and evolved a dynamic design system that scaled with new features, cutting design-to-dev handoff time by **~40%**.
 - Conducted user research (interviews, usability testing) and facilitated stakeholder workshops.
- **UI & UX Designer · De Renovatieplanner** Jul 2020 – Jan 2021
Shaped the design vision and product direction, structuring system features to deliver a stronger experience for client companies.
- **UX Designer · Xaranea** Jan – Mar 2020
Optimized the user experience of a complex CRM system and helped founders prioritize new features for existing customers.
- **UI & UX Designer · Appsharing** Feb 2019 – Jan 2020
Delivered interface design and branding across mobile apps, AR/VR, and e-commerce projects, focused on elevating the overall customer experience.
- **UI & UX Designer · Fans4Music (Internship)** Sep 2017 – Feb 2018
Created responsive web designs integrating graphic and motion design, and contributed to front-end web development.
